

Weekly Disease Surveillance Report

2022 Reporting Week 01: January 2 — January 8

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

Influenza (Flu) and COVID-19 Surge Breaks Records

During the first reporting week of 2022, Okaloosa once again experienced a major surge in COVID-19 activity, breaking the all-time record for new cases, percent positivity, and case rates. Influenza-like illness (ILI) also continued to rise. The COVID-19 community risk remains at HIGH. As of January 10, of all hospital beds in Okaloosa County, 11.5% were occupied by COVID-19 patients. Of those, 69% are unvaccinated.

On December 27, the CDC [updated the COVID-19 isolation and quarantine recommendations](#) for the general population. Since that time, CDC has provided [background information](#) for reduction of isolation and quarantine timeframes and [further information on quarantine and isolation guidelines](#). [Guidance for managing healthcare personnel](#) with COVID-19 exposure or infection was also updated to enhance protection for staff, patients, and visitors.

COVID-19 vaccination counts in Okaloosa County continue to increase slowly (see page 3). Providers are encouraged to review CDC's [Seasonal Influenza Vaccination Resources for Health Professionals](#) for counseling on co-administration of COVID-19 and flu vaccines, patient education, and the 2021-22 flu vaccine composition. For more information on the Omicron variant, please visit [Omicron Variant: What You Need to Know](#).

COVID-19 Booster Shots and Monoclonal Antibody Resources

The CDC has updated their guidance on COVID-19 [vaccinations](#) and, specifically, [booster](#) shots. This information is increasingly important as vaccination and booster status are considered for isolation and quarantine timelines. Please continue to promote the COVID-19 vaccine as it is highly effective at preventing severe disease and death.

FREE [Monoclonal Antibody Treatments](#) are available in Okaloosa for adult and pediatric patients (12 and older) either diagnosed or exposed to someone with COVID-19 and at high risk for severe illness, hospitalization, or death from COVID-19. Please follow the link for all locations.

COVID-19 Snapshot

Week 1 Review		Difference from Wk52
Resident Case Count	2369	+1197
Resident Case Count per 100K Population	1147.2	+579.4
Average Resident Cases per Day	338.3	+170.9
Percent Positivity	32.0%	+9.3

Data Source: Merlin Database

The Florida Department of Health (FDOH) provides the Centers for Disease Control and Prevention (CDC) with county COVID-19 data, including deaths.

Please visit the [COVID-19 Community Profile Report](#) webpage to obtain death data by downloading the most recent excel file and locating Okaloosa on the 'Counties' tab.

For questions related to COVID-19 death data, please contact the FDOH Office of Communications at 850-245-4111 or NewsMedia@flhealth.gov.

Week 1 Community Risk Level		
COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
HIGH	1147.2	32.0%
PREVIOUS WEEK RISK LEVEL: HIGH		
Low	<10	<5%
Moderate	10-49	5-7.9%
Substantial	50-99	8-9.9%
High	>100	>10%

Community risk level is the color of the higher risk level for the two indicators.

VACCINATION DATA RESOURCE

The CDC COVID Data Tracker presents county level vaccination data that includes vaccinations from:

- FL SHOTS, including FL Department of Health, retail pharmacies, and long-term care facilities,
- Dialysis centers participating in the Federal Dialysis Center Program,
- Health Resources and Services Administration partner sites, and
- Federal entities such as Department of Defense, Veterans Health Administration, Indian Health Service and Bureau of Prisons.

Influenza-Like Illness

Week 01: January 2 — January 8

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

Figure 5: Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa County for the 2017-18, 2018-19, 2019-20, and 2020-21 influenza seasons by week. Data source: ESSENCE

ANALYSIS: During Week 01, flu reporting partners and ESSENCE (a syndromic surveillance system) reported an increase in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County increased from 5.49% during Week 52 of 2021 to 5.94% during Week 1 of 2022. Flu partners reported no positive rapid influenza tests this week. Over the past three weeks, 85 out of 531 influenza specimens submitted to the state lab were positive (3 Influenza A H3, 50 Influenza A unspecified, 32 Influenza B unspecified). There were no ILI admissions, outbreaks, or deaths reported this week. The percentage of total ILI ED visits for Week 1 is higher than that of Week 1 last year.

Note: Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

% ILI by Age Group Week 01, 2022

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	30	191	15.71%
5-19	26	277	9.39%
20-34	32	575	5.57%
35-54	34	586	5.80%
55-74	115	507	22.68%
75+	6	265	2.26%
